European Journal of Operational Research 105 (1998) 630–631

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 105

Theory and Methodology

1 A model for warehouse order picking
R.L. Daniels, J.L. Rummel and R. Schantz

18 Optimal product and server locations in one-dimensional storage racks
R.G. Vickson and X. Lu

29 Multicriteria inventory classification using a genetic algorithm
H. Altay Guvenir and E. Erel

38 Optimal strategy for the integrated vendor–buyer inventory model
S. Viswanathan

43 Base stock policies for production/inventory problems with uncertain capacity levels
R. Güllü

52 Aggregate scheduling and network solving of multi-stage and multi-item manufacturing systems
H.-J. Huang and G. Xu

66 A new constructive heuristic for the flowshop scheduling problem
C. Koulamas

72 Time lag size in multiple operations flow shop scheduling heuristics
J. Riezebos and G.J.C. Gaalman

91 Capacity planning by the dynamic multi-resource generalized assignment problem (DMRGAP)
A. Shtub and K. Kogan

100 Searching for an optimal rotation age for forest stand management under stochastic log prices
A. Yoshimoto and I. Shoji

113 Bayesian inferences for several autoregressive processes
D. Salazar and D.H. Moen

118 Action-timing problem with sequential Bayesian belief revision process
J.-H. Ahn and J.J. Kim

130 Neural network as a simulation metamodel in economic analysis of risky projects
A.B. Badiru and D.B. Sieger

143 A learning curve model with knowledge depreciation
G. Li and S. Rajagopalan

155 Hierarchical multi-objective decision making
C. Homburg

162 Interval-valued preference structures
T. Bilgiç

184 Fluid stochastic Petri nets: Theory, applications, and solution techniques
G. Horton, V.G. Kulkarni, D.M. Nicol and K.S. Trivedi

202 Lower bounds for nonlinear assignment problems using many body interactions
B. Ramachandran and J.F. Pekny

216 Efficient cuts in Lagrangean 'Relax-and-Cut' schemes
M. Guignard

224 Non-linear integer programming by Darwin and Boltzmann mixed strategy
P. Tian, J. Ma and D.-M. Zhang

236 A Newton-type univariate optimization algorithm for locating the nearest extremum
C.-L. Tseng

371 Models of wayfinding in emergency evacuations
G.G. Løvås
390 The rural postman problem with deadline classes
A.N. Letchford and R.W. Eglese
401 One-dimensional machine location problems in a multi-product flowline with equidistant locations
B.R. Sarker, W.E. Wilhelm and G.L. Hogg
427 The choice of a technical efficiency measure on the free disposal hull reference technology: A comparison using US banking data
B. De Borger, G.D. Ferrier and K. Kerstens
447 Accommodating diverse institutional investment objectives and constraints using non-linear goal programming
J.G. Powell and I.M. Premachandra
457 Epsilon-dominating solutions in mean-variance portfolio analysis
D.J. White
467 Deterministic models of perishable inventory with stock-dependent demand rate and nonlinear holding cost
B.C. Giri and K.S. Chaudhuri
475 The canning problem revisited: The case of capacitated production and fixed demand
S.M. Pollock and D. Golhar
483 Sensitivity calculation of the throughput of an FMS with respect to the routing mix using perturbation analysis
T. Koltai and S. Lozano
494 Scheduling under a common due-date on parallel unrelated machines
G.I. Adamopoulos and C.P. Pappis
502 Scheduling a single machine to minimize earliness penalties subject to the SLK due-date determination method
X. Qi and F.-S. Tu
509 Impact of learning and fatigue factors on single machine scheduling with penalties for tardy jobs
V.R. Dondeti and B.B. Mohanty
525 On stochastic machine scheduling with general distributional assumptions
W. Li and K.D. Glazebrook
537 An optimal tree search method for the manufacturing systems cell formation problem
K. Spiliopoulos and S. Sofianopoulou
552 Designing reliable tree networks with two cable technologies
L. Gouveia and E. Janssen
569 The effects of exogenous variables in efficiency measurement – A Monte Carlo study
C. Yu
581 The utility efficient set and its interactive reduction
S. Rios-Insua and A. Mateos
594 Different transformations for solving non-convex trim-loss problems by MINLP
I. Harjunkoski, T. Westerlund, R. Pörn and H. Skrifvars
604 An approximately global optimization method for assortment problems
H.-L. Li and C.-T. Chang
613 A GRASP for the biquadratic assignment problem
T. Mavridou, P.M. Pardalos, L.S. Pitsoulis and M.G.C. Resende
622 Inner and outer approximations of technology: a data envelopment analysis approach
R. Färe and S.K. Li

Short Communication

626 A note on pseudo-invexity and symmetric duality
S. Chandra and V. Kumar
